## LONG SHORT-TERM MEMORY NETWORKS

### • Introduction

- **LONG SHORT-TERM MEMORY NETWORKS** (LSTMs) are a *special kind of RNN*, capable of learning long-term dependencies.
- Introduced by Hochreiter & Schmidhuber (1997).
- LSTMs are explicitly designed to avoid the *long-term dependency problem*.

The *long-term dependency problem* in (RNNs) refers to the *difficulty* of capturing and learning relationships or dependencies between distant time steps in sequential data.

Traditional *RNNs* struggle with retaining information over long sequences due to issues like *vanishing or exploding gradients* during training.

5

## LONG SHORT-TERM MEMORY NETWORKS

### • RNN vs LSTM

LONG SHORT-TERM MEMORY NETWORKS

DR. M. UMAIR

7

## LONG SHORT-TERM MEMORY NETWORKS

### • Introduction

- **CENTRAL IDEA:** A memory cell which can *maintain its state over time*, consisting of an *explicit memory (cell state)* and gating units which *regulate the information* flow into and out of the memory.

## FORGET GATE

## FORGET GATE

### • Illustration

## FORGET GATE

### • What does it do?

- Controls what information to *throw away from memory*.

## LONG SHORT-TERM MEMORY NETWORKS

### • Forget Gate Calculations

$h_{(t-1)}$	0.100	1.000	0.500
